

*Access to research
in the developing world*

Research4Life provides doctors, researchers and librarians in 8,700 institutions and more 115 low- and middle-income countries with free or low cost access to over 85,000 peer-reviewed scientific journals, books and databases from the leading scientific publishers.

As a unique public-private partnership between 200 publishers, the International Association of Scientific, Technical and Medical Publishers, Cornell and Yale universities, the WHO, FAO, UNEP, WIPO and ILO, Research4Life builds research capacity in the developing world.
