

ACCESS TO RESEARCH IN THE DEVELOPING WORLD

Research for Health | Research in Agriculture | Research in the Environment
Research for Innovation | Research for Global Justice

WHAT IS RESEARCH4LIFE?

Research4Life is the collective name for five public-private partnerships which seek to help achieve the UN's Millennium Development Goals by providing the developing world with access to critical scientific research.

Research4Life empowers universities, colleges, research institutes and government ministries as well as non-governmental agencies, extension centres and hospitals with access to scientific and professional knowledge that was never before imagined.

Since 2002, the five Research4Life programmes have given people at thousands of institutions in over 120 countries and territories in the developing world free or low-cost access to up to tens of thousands of peer-reviewed international scientific journals, books, and databases provided by the world's leading science publishers.

WHAT'S AVAILABLE?

- Online access to tens of thousands of peer-reviewed international scientific journals, books, and databases.
- Full-text articles can be downloaded for saving, printing or reading on screen.
- Searching by keyword, subject, author or language.
- Resources available in several languages.
- Training in information literacy and promotional support.

Thank you very much for accepting our registration to use the online AGORA journals. I believe that this is the bridge that will give our scientists the chance to update their research.

and Resources, Viet Nam*

 www.who.int/hinari

 hinari@who.int

Launched in 2002, Hinari is managed by the World Health Organization in partnership with Yale University Library and more than a hundred publishers.

Institutions in more than a hundred countries have access to Hinari, which provides access to thousands of peer-reviewed journals covering medicine, nursing and related health and social sciences. It also includes many databases, indexes and reference books, as well as journals in several languages. The journals can be searched through a special and easy-to use version of PubMed (Medline).

 www.fao.org/agora

 agora@fao.org

Launched in 2003, AGORA is managed by the Food and Agriculture Organization in partnership with Cornell University and dozens of publishers.

AGORA provides access to thousands of high-quality international journals covering agriculture, fisheries, food, nutrition, veterinary science and related biological, environmental and social sciences. The journals can be searched using a special subset of CAB Abstracts.

 www.unenvironment.org/oare  oare@unep.org

Launched in 2006, OARE is managed by the United Nations Environment Programme (UNEP) in partnership with Yale University and dozens of publishers.

OARE provides access to thousands of scientific journals in a wide range of disciplines contributing to our understanding of the natural environment, including environmental toxicology and pollution, zoology, botany, geology, climatology, geography, environmental economics, environmental law and policy, environmental biotechnology, energy, and many other disciplines.

Hinari is very essential for this institution to meet the demands of the academic staff and with the dwindling of funds for journal subscriptions. We have seen Hinari transform institutions like ours.

ARDI

Research for Innovation

 www.wipo.int/ardi

 ardi@wipo.int

Launched in 2009, ARDI is coordinated by the World Intellectual Property Organization. The aim of ARDI is to promote the integration of developing and least developed countries into the global knowledge economy.

ARDI provides access to up to tens of thousands of journals and e-books in diverse fields of science and technology. ARDI programme seeks to support researchers in developing countries in creating and developing new solutions to technical challenges faced on a local and global level.

 www.ilo.org/goali

 goali@ilo.org

Launched in 2018, GOALI is coordinated by the International Labour Organization (ILO) and its partners, Brill Nijhoff, as founding publisher and initiator of the programme, the International Training Centre of the ILO, Lillian Goldman Law Library at Yale Law School and the Cornell Law School Library as academic partners.

The aim of GOALI is to improve the quality of legal research, education and training in low- and middle-income countries, and in turn strengthen legal frameworks and institutions and further the rule of law. Users can access up to thousands of peer-reviewed journals and e-books in selected subject areas of law from the world's leading academic publishers.

HELP AND SUPPORT

Training and outreach

In order for librarians and researchers to make the best use of the resources provided, we understand the importance of training and effective promotion of the services.

The partners are committed to providing appropriate long-term training on the use of online resources and more. A range of training modules produced by the partners and field-tested by librarians and information managers from many developing countries are available online.

Eligibility

Publicly funded non-profit institutions in most low and middle income countries are eligible to register for access to the Research4Life content. A detailed list of qualifying countries can be found at:

www.research4life.org/eligibility.

Please note that for some countries there are some exceptions to eligibility for certain titles. In addition, the eligibility of countries, areas, and territories will change as their development indicators change. If you have any questions regarding technical details and requirements, please email the Research4Life helpdesk: r4l@research4life.org.

RESEARCH4LIFE PARTNERS

Research4Life is a public-private partnership between WHO, FAO, UNEP, WIPO, ILO, Cornell and Yale Universities, and up to 155 science publishers facilitated by the International Association of STM Publishers. The partnership's goal is to reduce the gap in scientific and professional knowledge between industrialised countries and the developing world.

If you are interested in becoming a partner or you are an institution seeking research support, please get in touch.

For more information on Research4Life, email r4l@research4life.org or visit www.research4life.org
