

# RESEARCH4LIFE FEEDBACK REPORT 2020

“

*We are excited that the World Health Organization has established this unique platform with zillions of literature and journals to provide researchers, health workers and institutions in LMICs with access to help build their research capacity.*

LIBERIA

“

*Seguimos trabajando en esta hermosa labor como es la de poner al alcance de los estudiantes el Conocimiento Humano.*

NICARAGUA

“

*The five weeks of online learning in the Research4Life MOOC have been awesome and so inspiring. Thanks to the organizations involved and to all our facilitators.*

NIGERIA

“

*Tous mes remerciements pour cette marque de considération. Je vous assure que tout le personnel de notre hôpital était aux anges quand j'ai annoncé l'inscription de notre établissement.*

CONGO

“

*I would like to extend our heartfelt thanks and appreciation to Research4Life as an organization and to the team at the information desk for their assistance in having us reconnected to the programs. Words are inadequate to express how access to these programs have filled the gaps that existed in our library collection over the past years.*

LIBERIA

“

*J'étais très émus de participer à ce cours parce qu'une des difficultés que j'ai rencontré quand j'élaborais ma thèse de pharmacie en 2008 était la recherche bibliographique. Il n'est jamais trop tard pour bien faire. Un grand merci à vous et toute l'équipe de coordination de Research4Life pour m'avoir permis de maîtriser les ressources électroniques.*

BURKINA FASO

“

*In the workshop I gained new knowledge and ideas about other Research4Life programs. Before I was using only Hinari, but now I know there are other programs freely available to us.*
